

## Affordability Report Shapefiles

[DropBox folder link](#)

The three shapefiles within the folder include the following attributes:

1. PWSID and water system name and/or NJPDES and sewer system name
    - Census Tract IDs and respective population counts from the ACS 2014-2018 5-year estimates are included in the water-sewer overlap layer
  2. Data for the metric “*Percentage of households that may struggle to pay water and sewer utility bills*” at the three thresholds (baseline, high, and severe), as defined in the affordability report.
- 

### Source Layers

1. Water Service Areas
  - [Original layer from NJDEP’s NGIN Open Data Portal](#)
2. Sewer Service Areas
  - [Original layer from NJDEP’s NGIN Open Data Portal](#)
3. Water-Sewer Overlap
  - **Note:** These polygons were created via an overlay of water service areas, sewer service areas, *and census tracts*
  - [Original census tract layer from the U.S. Census Bureau \(2018\)](#)
